

# cXc Milestone 1 Report

We are pleased to report the completion of Tech Milestone 1. This deliverable included the launch of a new version of our app, and preparation to launch tokenized upvotes on Tonomy. In this report, we will show what we delivered.

We have pasted in the deliverables as written in the [grant proposal](#), and added [#]s to each feature to make it easier to verify everything has been completed.

## Deliverable Stated - Part 1

- [1] Beta Version Launches
  - [1] Localized content + [3] charts organized by Upvotes
  - [4] Time-based upvotes, with filtering capabilities

## Delivered

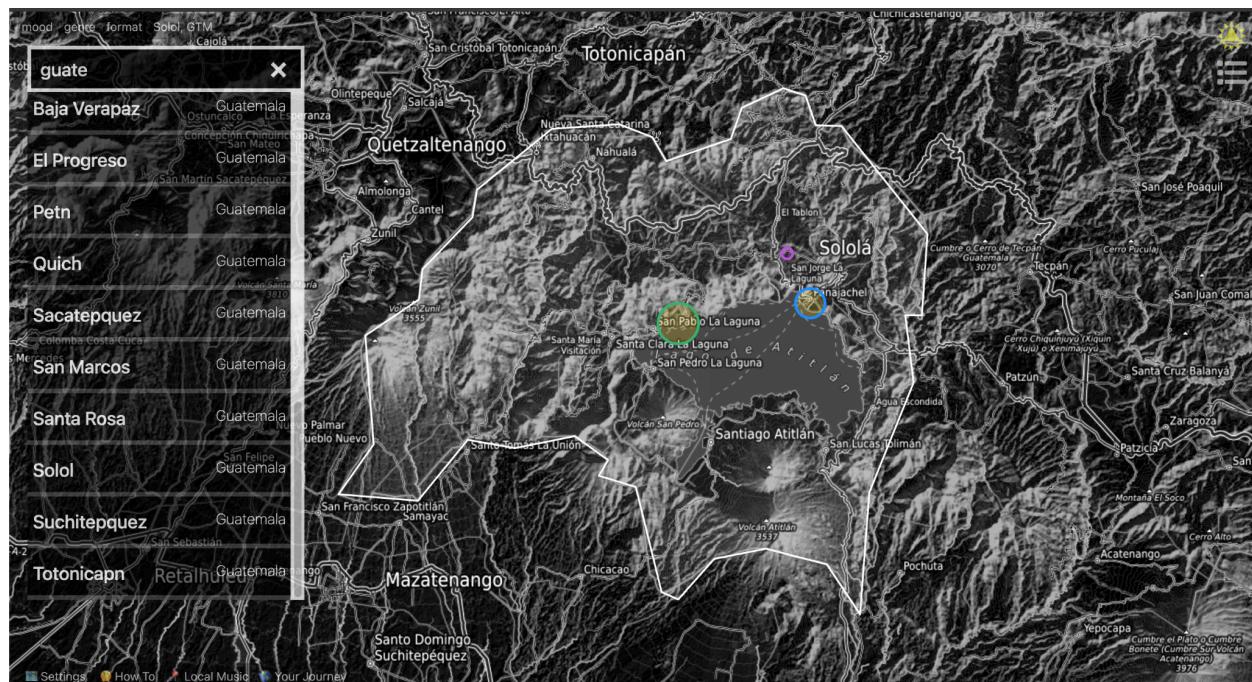

[1] A new version of our app was launched on March 18, 2025 at [cXc.world](https://cXc.world)

We successfully launched cXc.world with tokenized upvotes (currently on WAX) which will come to Pangea after ~6 months of running the Invite Program.

## Features Launched

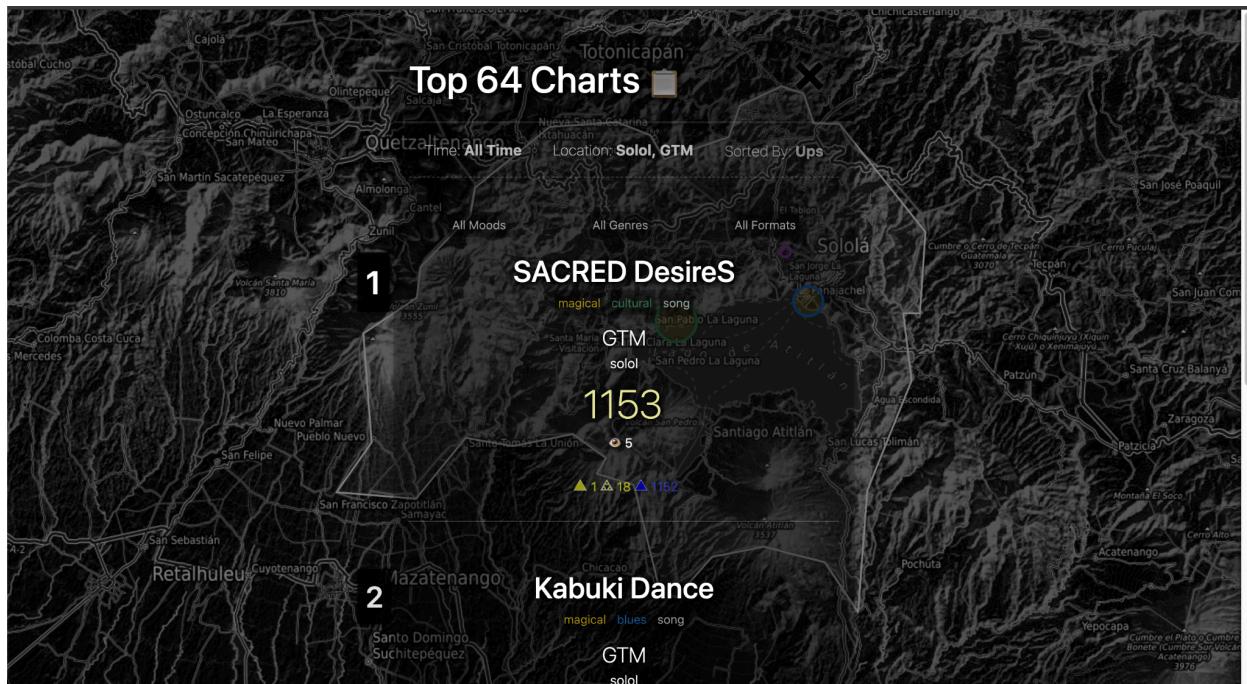

### [2] Localized Content Search

We incorporated our geospatial database, allowing for localized competitions between musicians.

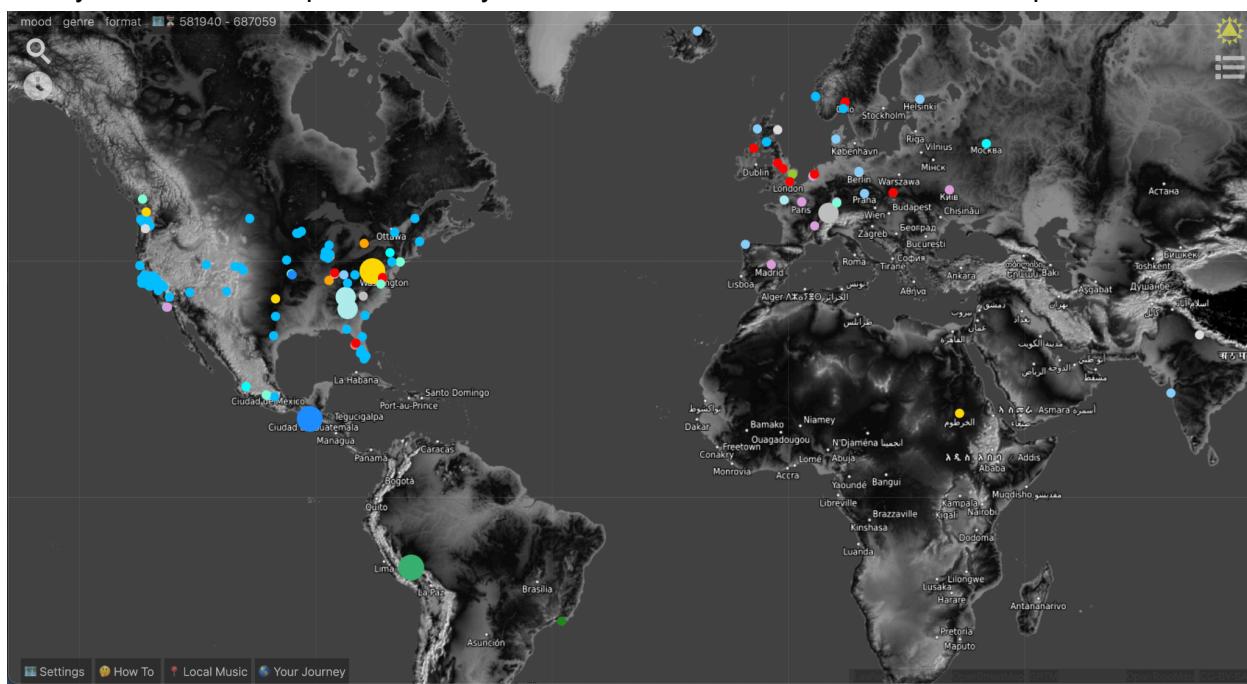

### [3] Local Music Charts by Upvotes

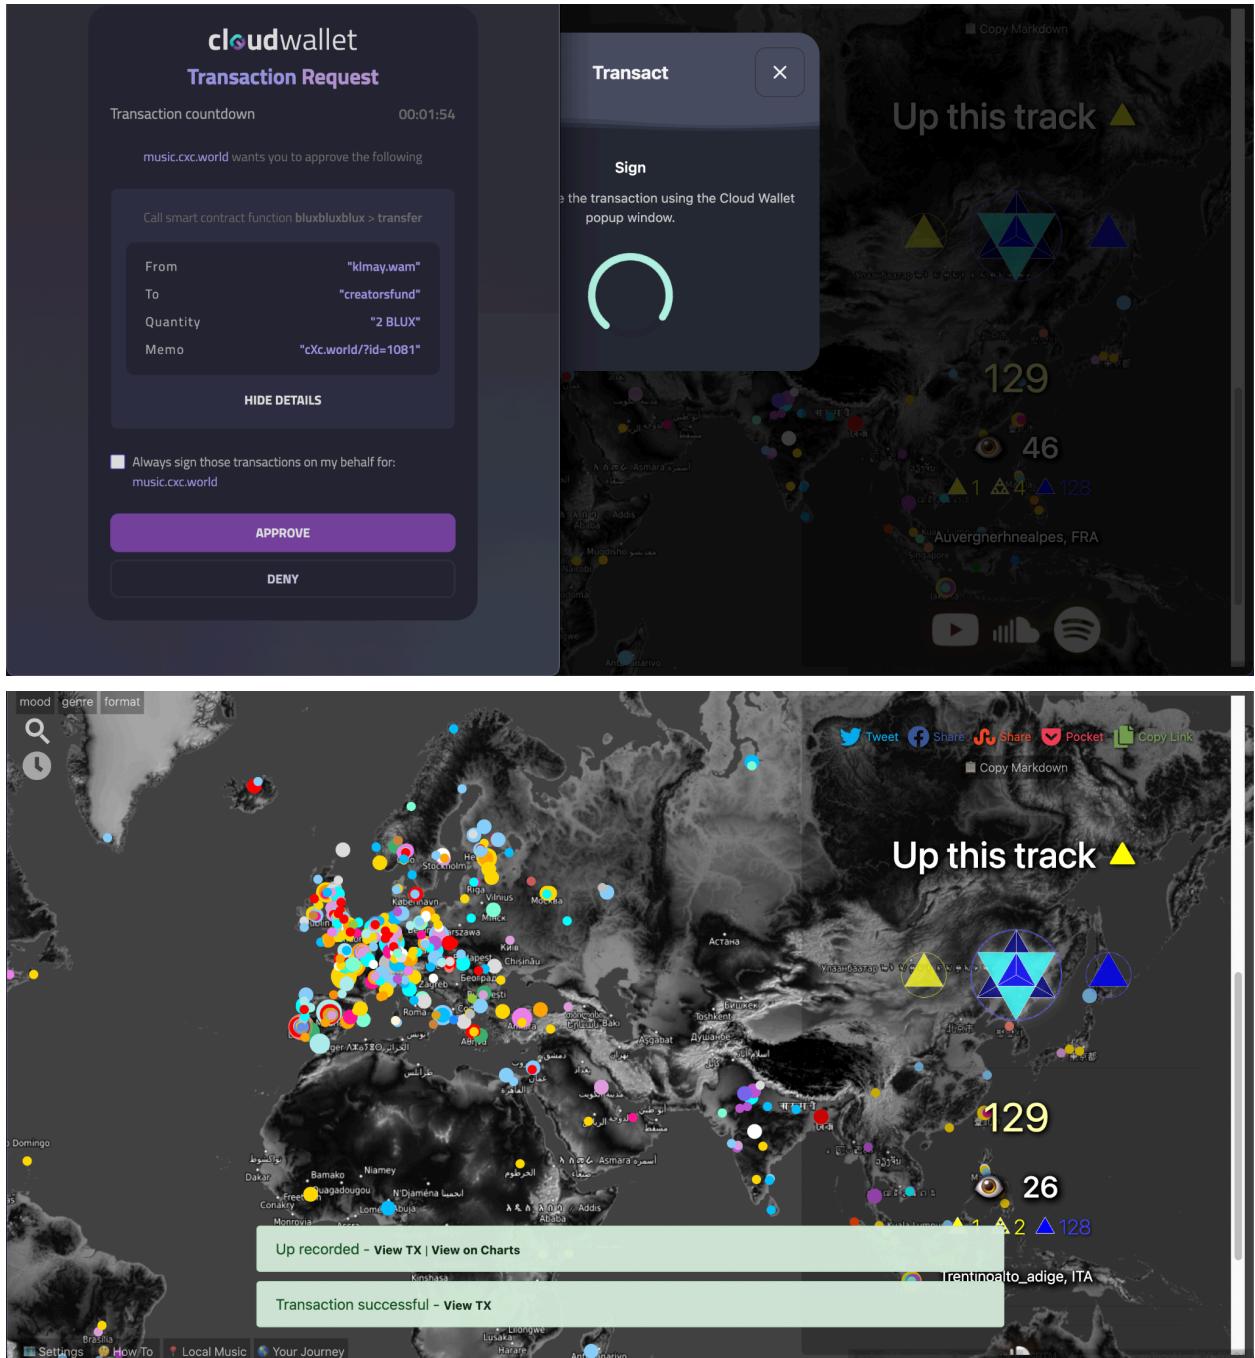

Here you can see the top charts for one district in Guatemala.

### [4] Time-Sorted Upvotes including Charts

Here you can see the upvotes sent by our users since we launched tokenized upvotes in March.

We look forward to a similar flow for Tonomy in our next deliverable.

## **Deliverable stated - Part 2**

- [5] Invite System to Tonomy
  - [6] Invite contract launched on Tonomy
  - [7] Contract allows early-adoption of free upvotes on Tonomy (6 months)

## **Delivered**

[5] Our solution involved two smart contracts, one to bridge BLUX to Tonomy, and one for the invite program. The bridge was the best solution for us, as it allows our tokenomics to carry over to Tonomy, and allows us to launch cXc.world on Tonomy with full upvoting capabilities, and to reward users of the invite program with BLUX tokens on Tonomy.

**[6] Invite Contract:** <https://github.com/currentxchange/TonomyInvite>

**Bridge Contract:** <https://github.com/currentxchange/Ant-Bridge-Contract>

[6] Note - To launch, we have passed the compiled wasm to the team (Jack Tanner), and they are pending launch at invite.cxc and bridge.cxc with tokens on the contract tokens.cxc.

[7] The invite contract gives BLUX (allowing the free tokenized upvotes) in a gamified way, using upstreams of referrals, and a Tetrahedral reward series to multiply the rewards a user can earn when inviting + having their downstream invite. This invite program will run for ~6 months, allowing a user to accrue rewards during the time active.

## **Conclusion**

We have delivered a new version of our app that includes tokenized upvotes, and started the process of migrating to Tonomy by completing the key tech for our invite program. Please reach out to Douglas Butner (godsolislove on Telegram) directly or through the grant chat with any questions, clarifications or requests for improvement. We look forward to the Tonomy invite system launch, and the full cXc integration.

App information:

<b>Property</b>	<b>Value</b>
-----------------	--------------

<b>App Name</b>	cXc.world
<b>App Username</b>	cXc
<b>App Description</b>	cXc.world is the tokenized Reddit, on a map. Subreddits are districts and nations, where music battles to represent the area. One song can go to the top of the world of music, as charts grow af fractals, and reset daily. Upvote once per 5 minutes. Buy Music NFTs from artists. Use BLUX to boost songs to #1.
